6. ☐ Interview Summary (PTO-413), Paper No./Mail Date _____
7. ☐ Examiner's Amendment/Comment
8. ☒ Examiner's Statement of Reasons for Allowance
9. ☐ Other _____

1. The following is an examiner's statement of reasons for allowance: The prior art of record fails to show or suggest the limitation of an absorber having an orifice valve plate with holes with the amount of hole opening being adjusted by a rotary valve plate along with the limitation of projections of the rotary valve plate engaging with guide grooves on the inner wall of the cylinder of the absorber. Wilson and Applegarth broadly show guide means for rotating the rotary valve plate, but the guide means do not include projections of the rotary valve plate engaging in grooves on the cylinder inner wall. San Pablo De La Rosa, Holle, and Heideman teach the use of piston cylinder devices including guide grooves on the inner wall of the cylinder, but do not show or suggest the limitation of rotating a rotary valve plate to adjust the opening size of holes on an orifice valve plate. Orlandi teaches the use of a rotary valve plate 11 or 12 with unnumbered peripheral projections, but fails to show the limitation of the rotary valve plate being in the environment of a shock absorber and fails to show the limitation of the cylinder wall containing guide grooves to rotate the rotary valve plate.

Accordingly, claims 1 and 11 and their dependent claims are allowable. Claims 2-10 and 12 are allowable due to their dependency from claims 1 and 11, respectively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
